

Mathematical Sciences Building at Wits University

The new Mathematical Sciences Building at Wits University was opened in late 2014. The Wits Faculty of Science and the DST/NRF Centre of Excellence in Mathematical and Statistical Sciences (CoE-MaSS) took up residence in the building in December 2014.

In addition, four academic schools (namely Mathematics, Computational and Applied Mathematics, Computer Science, and Statistics and Actuarial Science) moved into this new building from January to March 2015. The building is now running at full capacity.
