Dear Colleagues and Students

The COVID-19 management committee would like to advise the Wits community that a medical student has been quarantined after it was found that the student came into contact with a person who had been identified with COVID-19.

The student is being monitored closely and has not displayed any symptoms of COVID-19. The student has been screened and the test results are expected later today. However, as a precautionary measure the Faculty has cancelled the clinical activities scheduled for the student’s class today.

We will keep you updated as soon as we have any further information.

Thank you

Wits COVID-19 Management Committee
