

# **CHAT GPT 3.5: An Introduction**

Introduction Login to ChatGPT Option 1: Use ChatGPT without an account Option 2: Use Chat GPT with an account ChatGPT Dashboard

## Introduction

ChatGPT, GPT stands for **Generative Pre-trained Transformer and it was developed by OpenAI**. Which Microsoft has a big stake in.

This is an advanced artificial intelligence (AI) chatbot designed to engage in natural language conversations. Leveraging sophisticated natural language processing (NLP) algorithms, ChatGPT produces dialogue that closely mimics human interaction. While addressing inquiries, this sophisticated language model aids in generating a diverse range of academic materials, including lectures, course content, research articles, social media announcements, programming examples, and correspondence with students. Leveraging ChatGPT's comprehensive capabilities, we may also harness its potential to enrich the learning experience for our students and streamline our instructional processes.

### Login to ChatGPT

Go to your browser and type in: **chat.openai.com**. you will be directed to GPT's homepage:
