

How to download 'Zotero 5.0'

- Zotero 5.0 will only work on '**Mozilla Firefox**', '**Google Chrome**' & '**Safari web**' browsers. Most PC's come with Firefox and Google Chrome standard but if you have an older machine you can download it
- Go to Google and type in '**Zotero downloads**' and open

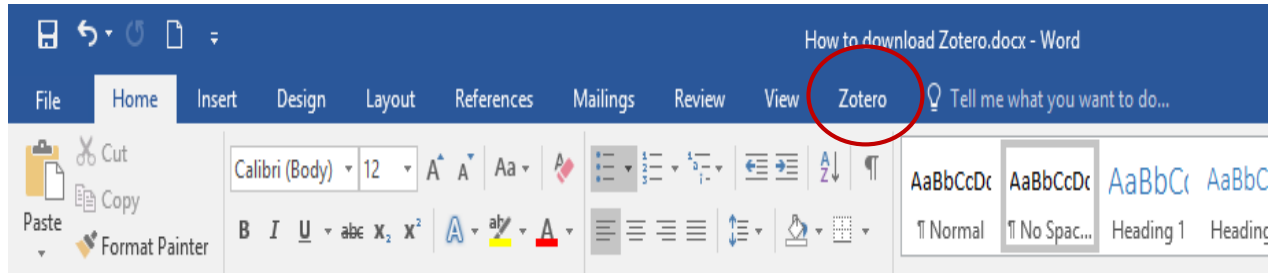

- Open '**Download**' under '**Zotero 5.0 for windows**' as shown below. Follow the prompts. The Zotero icon will sit on the desktop. Open it and pin another Zotero icon that will appear on the task bar at the bottom of your browser - by doing a right click. You will be using this icon to view your exported references.

- Once you have downloaded Zotero, another window that prompts you to install '**Zotero Connector**' will appear. Open Install connector of your choice as shown on the left above and follow the prompts.
- The Zotero Connector connects Zotero with the internet content that you intend to export and with Microsoft Word to do in-text citations and create a bibliography.

- Once you have successfully installed the **'Zotero Connector'** you will see  icon top right of your browser. If you see a **Z**, click on it, ➡ click **'Go it'** bottom right of the pop-up window then the **Z** will change to the above mentioned icon.
- When you open your word document you will see the Zotero link at the top. See screenshot below:

- Click on the Zotero link to view **'add citations'** and **'Create bibliography'**. See screenshot below:
