

ACADEMIA-INDUSTRY COLLABORATION

30 SEPTEMBER TO
1 OCTOBER 2024

The Wits Innovation Centre is hosting a 2-day workshop on Academia-Industry Collaboration. The workshop will be to share insights and consider frameworks for engagement between Academia and Industry towards a more collaborative ecosystem. The format of the workshop will predominantly be in-person but we will plan for speakers to join online for a hybrid experience. Delegates will be invited from other cities in South Africa and Afretec universities outside South Africa. Industry players and targeted companies will be invited, amongst other delegates.

The Workshop will foster engagement between Industry and Academia including introductions that may foster new relationships, such as problem-solving projects for Industry.

The delivery format of the workshop will feature keynote presentations, engaging workshops, robust panel discussions, war stories, 'speed dating', and interactive sessions addressing the outlined themes and associated questions, emphasising the collaboration between academia and industry.
