

Curious frontiers : Merging knowledge, innovation, data and minerals for sustainable change

The Wits Mining Institute will host a two-day seminar where we will present research on 21st Century mining and exhibit prototype technologies and innovations. It is a unique event and a platform bringing together industry leaders, experienced academics, and stakeholders to exchange knowledge, share insights and explore the latest advancements in the mining industry. An impressive line-up of esteemed speakers and panellists have been secured who will share their expertise ensuring an enriching participant experience.
